Editorial:

Donations are something that people in countries like Australia, New Zealand should consider. Lets say about 100 people donate \$100 in one year that's \$10,000. That much money could seriously help countries overseas and this doesn't even include currency change. Your donation can make a difference.

Arya Pratinidhi Sabha of Qld raises funds for Uttarakhand Disaster in India and School Repairs in Fiji.

Arya Pratinidhi Sabha of Qld (APSQ) members and well wishers got together and donated funds to provide assistance to the disadvantaged. This initiative was taken by the Arya Samaj members considering the less fortunate ones who were affected in recent disaster and request made by school in Fiji.

The Uttarakhand Disaster is well known to many of us around here in Australia. The devastation has been enormous and Delhi Arya Pratinidhi Sabha in India is helping with relief work. Our contribution will be sent to them, and they will use it for relief works. The School repairs funding was requested by a Primary School in Labasa Fiji, and Sabha members contributed as well to help in repairs.

Sabha believes donation given is our real friend. What we have shared with the needy gives lasting happiness. The Sabha will in future continue to take active part in sharing and providing help and available resources to needy. The President of the Sabha Mr Jitendra Deo thanked all the members for this noble cause and pointed that by undertaking this sort of activities, our communities can also integrate with global society.

According to **The VEDAS** it is mankind's **Dharma** (our duty) to help others. **Dharma** means duties and essential characteristics, without which a thing cannot retain its very own existence. Religion may be a personal affair owing its allegiance to personal beliefs and convictions of a person, but **Dharma** is an universal affair. **Dharma** makes people broad minded and as such binds and holds them together. Righteous people, adhering to **VEDAS**, therefore, consider the whole world as one family. **VEDAS** expect every human being to be humane in true sense and thus advocate "humanism" as the **Dharma** of the entire humanity. Donations are an integral part of Religion. Since time immemorial both the terms 'Donations' and 'Religion' have been used together, so much so that they have become synonymous to each other. Be human and humanise others, this is the message of **VEDAS** since its eternity.

Let us all move forward with **Dharma** and consider the whole world as one family. There is definitely optimism as we look ahead and give a helping hand to disadvantaged where we will emerge stronger and more resilient than ever. May GOD bless you all.

The Qualities of God, Soul and Matter.

At the dawn of every Creation, God takes Matter and makes it into five Elements, Space, Wind, Fire, Water and Earth, and composed them into a whole proportionately which is called the Cosmos . God makes the bodies out of the materials of the Cosmos which the Souls occupy, any object which grows or moves has presence of Soul. When Soul is removed from the body by death or otherwise it does not function and starts to decay, this is the normal or natural course or function of every created object from the Sun to a Microbe.

God Soul and Matter are combined together to make this Cosmos. God is the Agential cause, and Matter is material cause. Souls are the purpose of this creation, from eternity to eternity. This is a perfect plan, and since it is perfect there is no room for revision, if any one has to make something, he has to find a maker, material and purpose before reality is achieved. In every creation this procedure is adopted , perfection never under goes correction addition or subtraction, perfection is a quality of God. God is Perfect, eternal and all powerful, all knowing and present everywhere at the same time. Matter is eternal and cannot create itself, Souls are eternal, and have limited power to think and to act. Souls are innumerable in number or you may say countless, Souls can do most things like God in a limited way, but cannot create a Sun Moon, place and sustain them where they are as it cannot achieve any thing without creating a cause.

Soul is the master of the whole body structure. The five cognitive senses send their respective messages to the mind, and the mind relays the messages to the intellect. The intellect then sends the messages to the Soul, which makes decision of good and bad. The Ego gives the Soul the power to think individually. The eyes only function with light, the ears with wind, the nostrils with water, the tongue with water, the skin with feelings from earth. The five cognitive senses function because of space and gravity. The Souls of humans are influenced by impressions or *Sanskaar's* and the impressions are left in the memory bank for future references.

The five Cognitive senses are related to the five elements which are space Air, Sun, Water and Earth. If a person wants to do something, he has to use the cognitive senses and it could be one or more of the five elements.

Tulsi Leaves- Benefits noted:

- 1) **Tulsi leaves** are used in the Sore Throats, Consumption of **Basil (Tulsi)** leaves with the Hot water will give you relief from the Sore throat. It can also used as a Gargle.
